Abdulquddus Yusuf

Lagos, Nigeria | +234 000 000 0000 | you@example.com | linkedin.com/in/abdulquddus-yusuf | github.com/Slay1der

Expected graduation: 2027 | Available for a 13–17 week internship starting May, June or July 2027

Education

University of Lagos (UNILAG) — Lagos, Nigeria

B.Sc. Computer Engineering, CGPA 4.2/5.0 — *Expected 2027*

Experience

IT Infrastructure Intern — Apr 2026 – Sep 2026

CWG Plc (Computer Warehouse Group) — *Lagos, Nigeria*

- Set up **Zabbix** monitoring and **Grafana** dashboards for servers across the company environment, giving the team visibility into availability and resource usage
- Configured alerting and used **Prometheus** metrics to track server health and respond to issues before they affected users
- Administered **Linux** and **Windows** servers, including Active Directory users, groups and Group Policy
- Ran backup and recovery jobs with **Veeam Backup & Replication** and worked on **Nutanix** hyperconverged infrastructure
- Performed data-centre operations: server racking, hardware upgrades and **RAID** configuration on Dell PowerEdge PERC controllers
- Troubleshot LAN/WAN connectivity across switches and routers, escalating complex faults to senior engineers
- Built an interactive teaching website explaining the team's monitoring, backup and directory stack

DevOps Engineering Trainee — May 2026 – Present

TS Academy — *Lagos, Nigeria*

- Training in **Linux administration**, **Bash** scripting, **Docker** and **GitHub Actions** CI/CD through live sessions and deadline-driven practicals
- Delivering three graded practical projects: a Linux/networking toolkit, a Dockerised diagnostic CLI and a CI pipeline, each shipped in its own GitHub repo

Projects

Linux & DevOps Toolkit | *Bash, Docker, GitHub Actions* — 2026

- Bash toolkit for Linux system and network diagnostics
- Containerised the diagnostic CLI with Docker and added a GitHub Actions CI pipeline that tests and builds on every push

Ansible Automation Lab | *RHEL, Ansible* — 2026

- RHEL control node managing multiple hosts with playbooks and roles to automate users, packages, services and storage

Active Directory Lab | *Windows Server 2022, VirtualBox* — 2026

- Built a domain from scratch: AD DS, domain controller promotion, Group Policy, client domain join and RRAS/NAT routing

Kòkọ AI | *Best UI/UX, Intron Sahara Hackathon* — 2026

- Voice bookkeeping app letting market traders record sales, credit and stock in English, Pidgin, Yorùbá, Hausa or Igbo

Technical Skills

Languages: Python, Bash, C++, SQL
Linux & Automation: RHEL, systemd, Ansible, shell scripting
Observability: Prometheus, Grafana, Zabbix
Containers, Orchestration & CI/CD: Docker, Kubernetes, GitHub Actions, Git
Infrastructure: Active Directory, Nutanix, Veeam, RAID, LAN/WAN networking
Certifications: Red Hat Certified Engineer (RHCE); Red Hat Certified System Administrator (RHCSA)
